The reply filed on 10/12/2006 is not fully responsive to the prior Office Action because of the following omissions or matters:

As part of this response to the restriction requirement mailed 09/07/2006, applicant has elected with traverse of Group I, drawn to a method for treating a subject, and species of SEQ ID NO:16 conjugated to DT. The traversal was on the ground that Jose et al. (JBC 1994. 179:881-887 Reference cited on IDS filed 01/03/05) do not teach human eotaxin and vaccines or immunogenic conjugates or methods of treatment involving generating an active immune response to eotaxin. This is not found persuasive for reasons of record. Further, it is noted that the instant claims are drawn to eotaxin in general and not to human eotaxin. Furthermore, Jose et al. teach that based on their study human eotaxin can be important in human asthmatic lung (see Results and Discussion on pages 883-886). Since Applicant's inventions do not contribute a special technical feature when viewed over the prior art they do not have a single general inventive concept and so lack unity of invention. Therefore, the Restriction Requirement is deemed proper and is made FINAL. Moreover, applicant has not indicated species of a specific condition as set forth in the Restriction Requirement mailed 09/07/2006 (see Section 9 on pages 4-5).

The restriction requirement indicated that is Group I is elected, applicant is further required to elect a method for treating specific condition (e.g. asthma as recited in claim 2).

As previously stated, applicant has not indicated the elected species of one specific condition.

Since the above-mentioned reply appears to be bona fide, applicant is given ONE (1) MONTH or THIRTY (30) DAYS from the mailing date of this notice, whichever is longer, within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD MAY BE GRANTED UNDER 37 CFR 1.136(a).
